

Speechcraft Participant Fee Calculation:

SPEECHCRAFT

Best practices to identify the right price for your Speechcraft?

1. Identify an appropriate Venue and its cost (V)
2. Identify the catering Costs, if any (C)
3. Consider the price of the Speechcraft Digital Bundle from TI (S)
4. Include the cost of 6 months TI membership of 60\$
+ the 20\$ new member fee (T)
5. Total number of Participants (P)

Therefore, you get:

$$\text{PRICE FOR ONE SPEECHCRAFTER} = (V+C+S+(T \times P))/P$$
